

A Brief Summary of Statistics Course

统计学课程知识总结

Vincent

2021 年 2 月 24 日

目录

1 统计推断部分	3
1.1 Statistical Model and Statistics	3
1.1.1 Statistics	3
1.1.2 Exponential Family	4
1.1.3 Sufficient and Complete Statistics	5
1.2 Point Estimation	6
1.2.1 Optimal Criterion	6
1.2.2 Method of Moments	7
1.2.3 Maximum Likelihood Estimation	8
1.2.4 Uniformly Minimum Variance Unbiased Estimate	9
1.2.5 MoM and MLE in Linear Regression	11
1.2.6 Kernel Density Estimate	13
1.3 Interval Estimation	14
1.3.1 Confidence Interval	14
1.3.2 Pivot Variable Method	15
1.3.3 Confidence Interval for Common Distributions	15
1.3.4 Fisher Fiducial Argument*	17
1.4 Hypothesis Testing	17
1.4.1 Basic Concepts	18
1.4.2 Hypothesis Testing of Common Distributions	19
1.4.3 Likelihood Ratio Test	21
1.4.4 Uniformly Most Powerful Test	21
1.4.5 Duality of Hypothesis Testing and Interval Estimation	22

1.4.6	Introduction to Non-Parametric Hypothesis Testing	23
2	R 语言命令部分	28
2.1	Basic Command	28
2.2	Useful Packages	28
2.2.1	ggplot2 package	28
2.2.2	data.frame and dplyr package	30
3	线性回归分析部分	30
4	多元统计分析部分	30
